Introduction
May session is a three-week term that follows spring semester and precedes summer term. May session was created as part of the switch to semesters that began with fall semester 1999. The 2001 May session is technically part of the summer term instead of the spring term (as it was in 2000). May session courses provide intensive learning opportunities not offered at any other time during the year.

- May session 2001 courses are defined as those summer 2001 term courses with a session_code value of '02.' Students are included in this report if they were enrolled for one or more of these courses.

- The May session report contains fewer tables than do regular semester reports, since total enrollment for May session is relatively small.

- Data are as of the end of the session, instead of the end of the second week.

- This report is available electronically at http://www.irr.umn.edu/.

- The raw data table for the production of the report is available for ad hoc query by authorized users through the IDEA system. The table name is ps_dwsa_stix_1015_int.
Highlights

**Total enrollment.** Total May session enrollment was 3,347, with 2,607 at the Twin Cities campus, 92 at Morris, 623 at Duluth, and 25 at Crookston.
